

BIOHAZARD BAG

Sturdy bags, ideal for disposing of biologically hazardous waste that must first be autoclaved. PP, 75 µm thick, orange, with 'Biohazard' label.

- Autoclavable up to 135 °C.
- The useful temperature indicator text is white before autoclaving, then black.
- 'Contents Have Been Autoclaved' indicates successful autoclaving.
- For easy recognition and highly visible 'Biohazard' label with the corresponding warning sign.
